actual size

- Mobile
- Compact
- Light
- Easy to use

An inkjet printer pen that fits into your pocket, prints dates, times and serial numbers at the press of a button in a neat, legible font.

An Inkjet Pen is the solution when you need to print individual text, consecutive numbers, date and time, and still remain mobile! You can print on any absorbent surface smooth or irregular, whether with or without contact, even if it has an irregular surface

A new way of thinking about portable marking

WORK SMARTER AND FASTER

There are numerous potential fields of application. Examples from the almost infinite variety of possible applications are in logistics departments, QA systems, and medical practices.

A real example is the release of goods for dispatch following a visual inspection. In future, such tasks can be carried out quickly and easily using an Inkjet Pen.

After the software has been installed, all the texts you need can be set in the program, and then are sent to the pen via USB cable.

And now it's ready for use! Position the inkjet pen above the surface you want to print on and press the red button as you move the pen.

Features:

Fully mobile! Prints texts, date, time, automatic numbering or coding, almost anywhere, on flat, uneven, rigid or soft surfaces.

Description:

- Pocket format, easy to carry, operates wirelessly
- Prints up to 40 characters in one line
- Define the texts, date, time and/or numbering on your PC
- Transfer your message via USB cable
- Adapts to left- or right-handed users
- Noiseless operation
- Just press the red button as you slide the pen across the paper
