## Changing message manually on the Handheld Inkjet

This relates to messages positions \#26-29. (P:26, P:27, P:28, P:29)
A simple message can be created and modified without connecting to a PC and employing the PCSet Easy software. In some cases, where only a single character needs to change, this can be a faster way to quickly change your code.

Messages created via the PCSet Easy software cannot be modified using this method. Using the PCSet software to load messages will override and clear all manually entered messages.

| VALUE $: ~ B$ | $\ldots$ | BEC |  |
| RETURN | RIGHT | DEC | INC |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |

7. Repeat this procedure until you have achieved the message you require. Press (1) "RETURN" when your message entry is finished.
Note that the "E" for the word "BEFORE" will need to be put in the second portion of the top line, since only 10 characters are allowed in one portion.
8. 

Press (2) "NEXT" and you will advance to "MODI TEXT 02".

Press (3) "VARY" and repeat steps $6-8$ to change your message, in this example on MODI TEXT 02 you would continue with the letter " $E$ ".
9. Once your message entry on all 4 portions is complete, press Press (1) "RETURN"
